

Waterproof IP68

Universal MC4 Connector

Copper Plating Protection

Bendable Up to 360°

Light Weight

Our 200W balcony solar panel offers an excellent efficiency rating of 23%, providing a reliable source of clean, renewable electricity. Lightweight design and IP68 waterproof ensure durability in any weather in any country. Pre-cut eyelets, the flexible solar panel can be securely attached to your balcony, facades or hung by hooks.

PNB200W solar panel is exceptionally light, weighting 3.8kg and 70% lighter than traditional fixed solar panels, making it convenient to move and mount. Easily flexes up to 360° simple to manage and suitable to fit any space.

MC4 solar connector links our 200W balcony solar panel directly to your existing home battery storage systems or compatible with virtually all power stations. Add PowerNation multi connecting cable to power all device via Anderson, XT or DC inputs.

Waterproof

Waterproof junction box with Diode (anti-converted Connection)

Eyelet

Eyelet, made of copper with rust proof and easy to mount

Integrated cables

Beautiful and convenient cable ties and equipped with MC4 connection

Lightweight & Bendable

Carbon fiber, ultrathin, ultralight and flexible

PRODUCT SPECIFICATION:

Model	PNF200W
Rated Power	200W
Power Voltage (Vmp)	105.0 W
Working Current (Imp)	5.4A
Open Circuit Voltage (Voc)	24.5V
Short Circuit Voltage (Isc)	6.8A
Cell Type	Monocrystalline silicon
Cell Efficiency	23.4%
Dimensions unfolded	115x97x1.85CM
Weight	4.2kg
Connector type	MC4
Waterproof	IP68
